Download Python

Hal pertama yang harus kita lakukan sebelum menginstall python adalah mendownloadnya terlebih dahulu.

Kunjungi website resmi download Python : <https://www.python.org/downloads/>

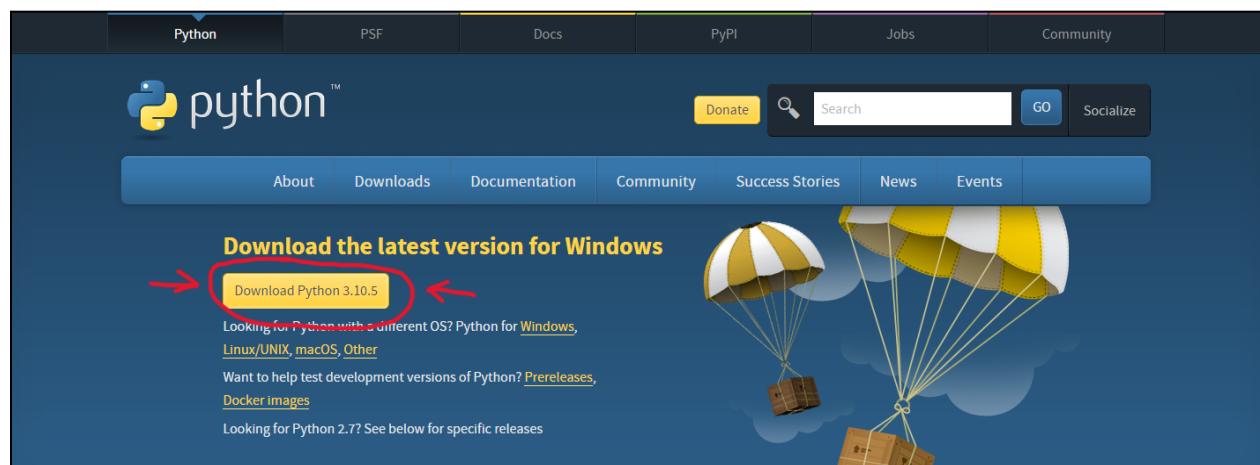

Tampilan landing pagenya akan seperti ini :

The screenshot shows the Python.org website's download page. At the top, there's a navigation bar with links to Python, PSF, Docs, PyPI, Jobs, and Community. Below this is a search bar and a 'Donate' button. A secondary navigation bar includes links to About, Downloads, Documentation, Community, Success Stories, News, and Events. The main content area features a large heading 'Download the latest version for Windows' and a prominent yellow button labeled 'Download Python 3.10.5'. Below the button, there are links for other operating systems (Linux/UNIX, macOS, Other), pre-releases, and Docker images. A table titled 'Active Python Releases' provides details on the current and previous versions of Python.

Python version	Maintenance status	First released	End of support	Release schedule
3.10	bugfix	2021-10-04	2026-10	PEP 619
3.9	security	2020-10-05	2025-10	PEP 596
3.8	security	2019-10-14	2024-10	PEP 569

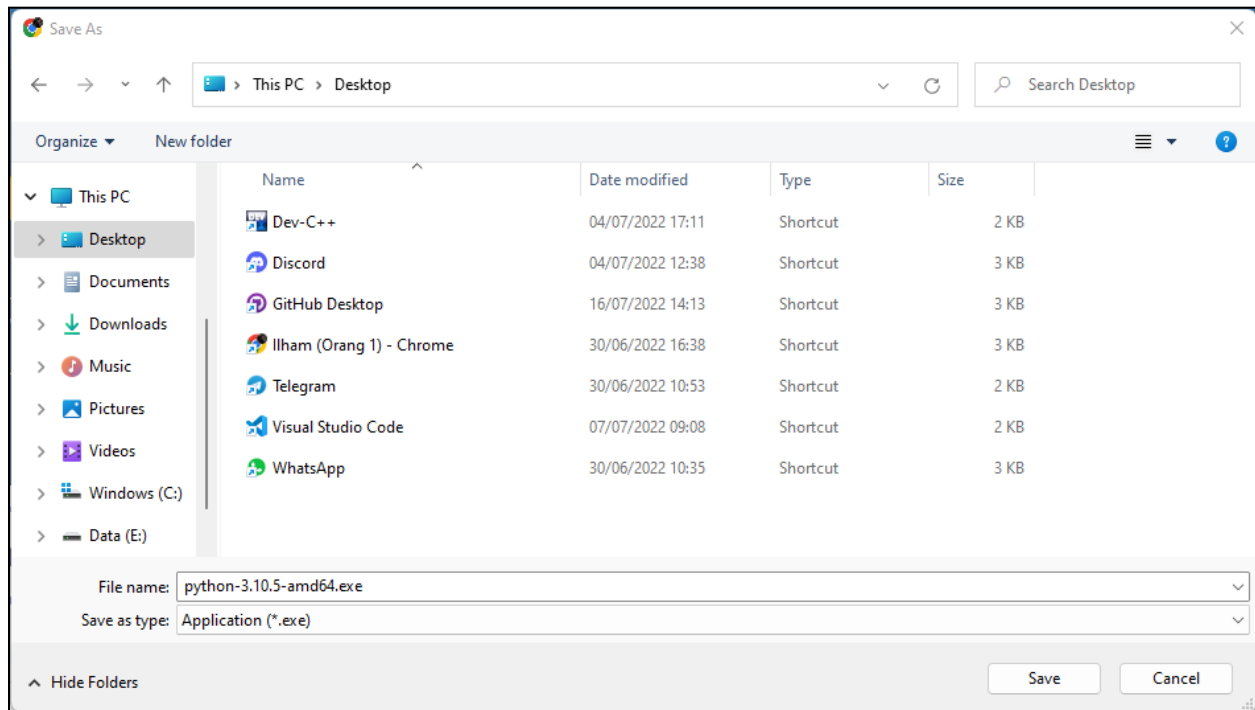

Kemudian klik tombol **download**.

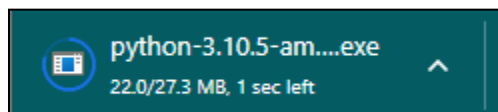

This screenshot is identical to the previous one, but with a red circle and arrows highlighting the 'Download Python 3.10.5' button, indicating the next step in the process.

Kemudian kita akan ditanya dimana tempat menyimpan hasil download. Kali ini saya menyimpannya di Desktop agar mudah diakses.

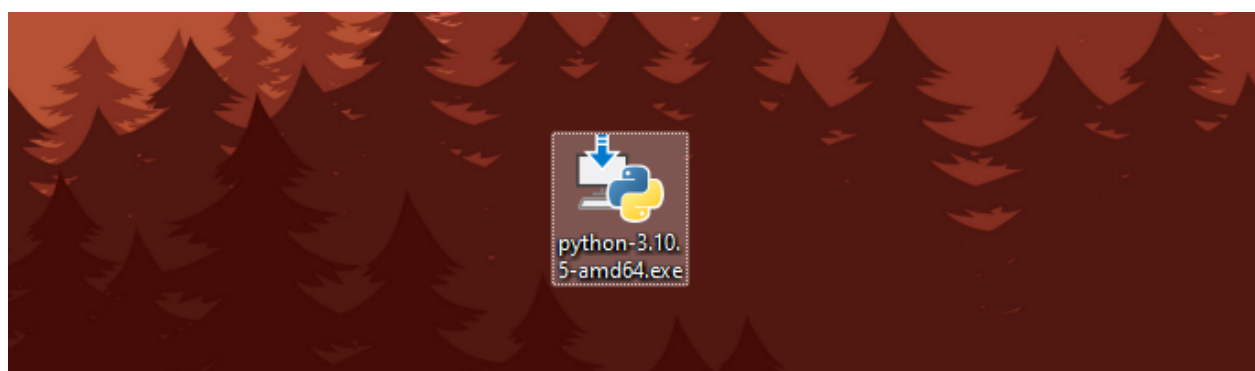

Setelah dirasa lokasi hasil download sudah pas, bisa langsung klik tombol save.

Kemudian proses download pun akan segera dimulai.

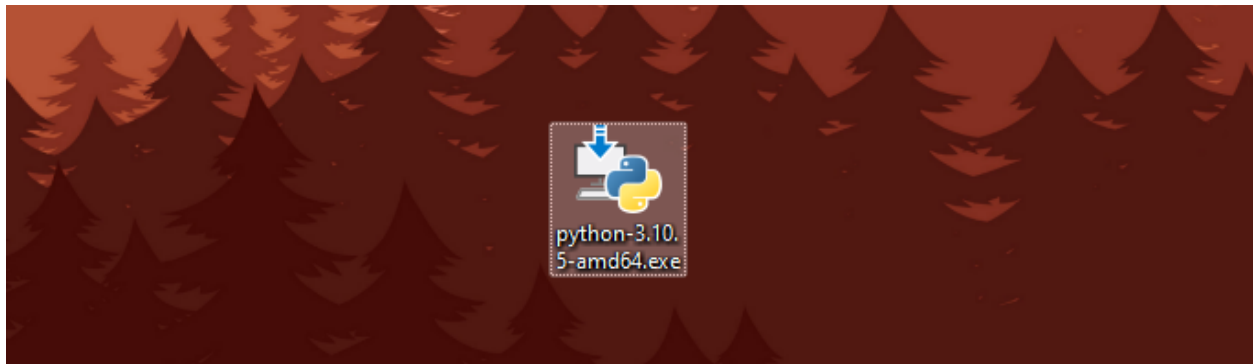

Setelah proses download selesai, kita bisa lanjut ke langkah selanjutnya yaitu menginstall python.

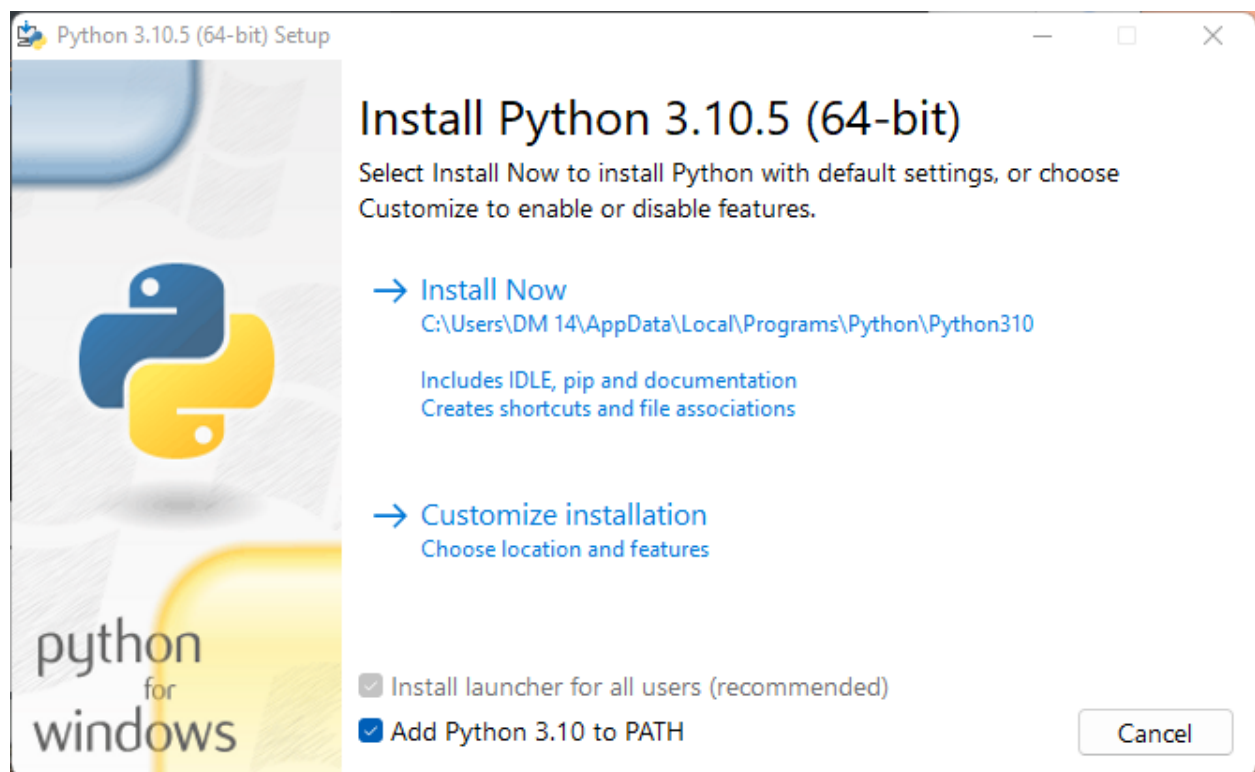

Install Python

Setelah berhasil mendownload file installer Python, kita bisa langsung menjalankannya untuk mulai menginstall python.

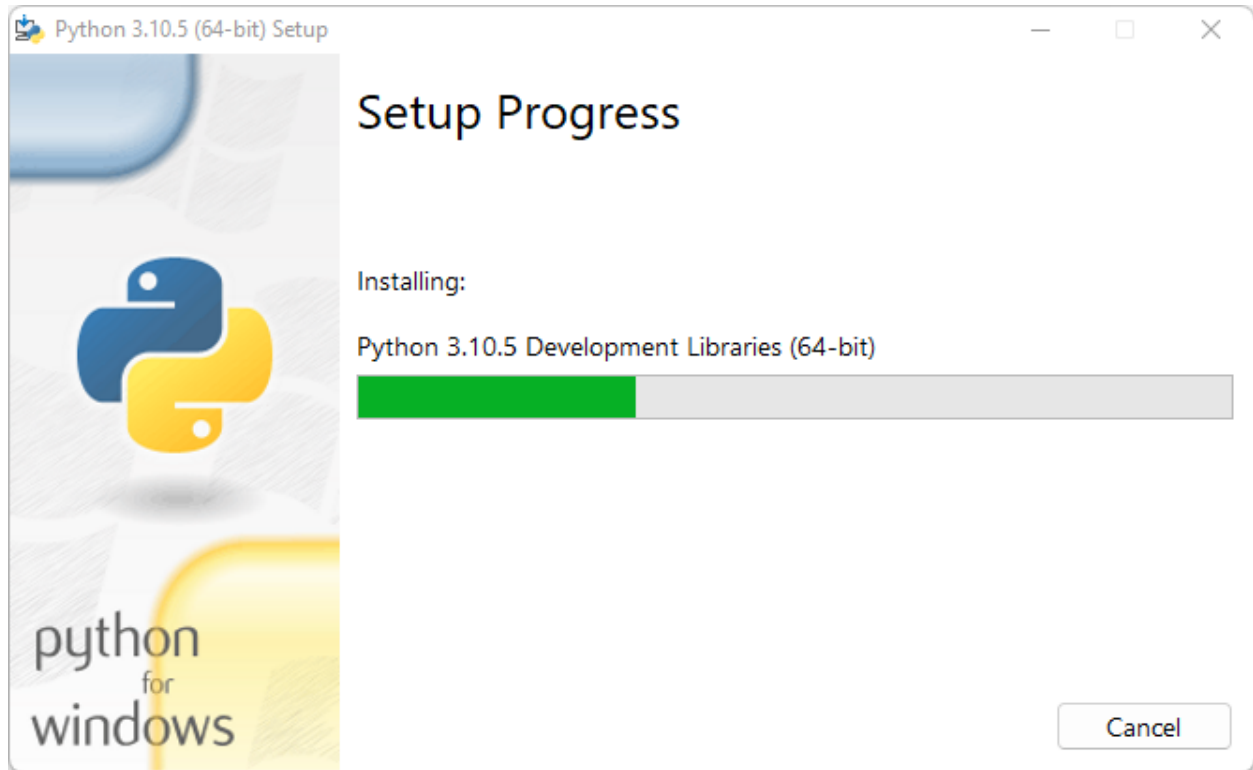

Jalankan installer Python dengan cara double click.

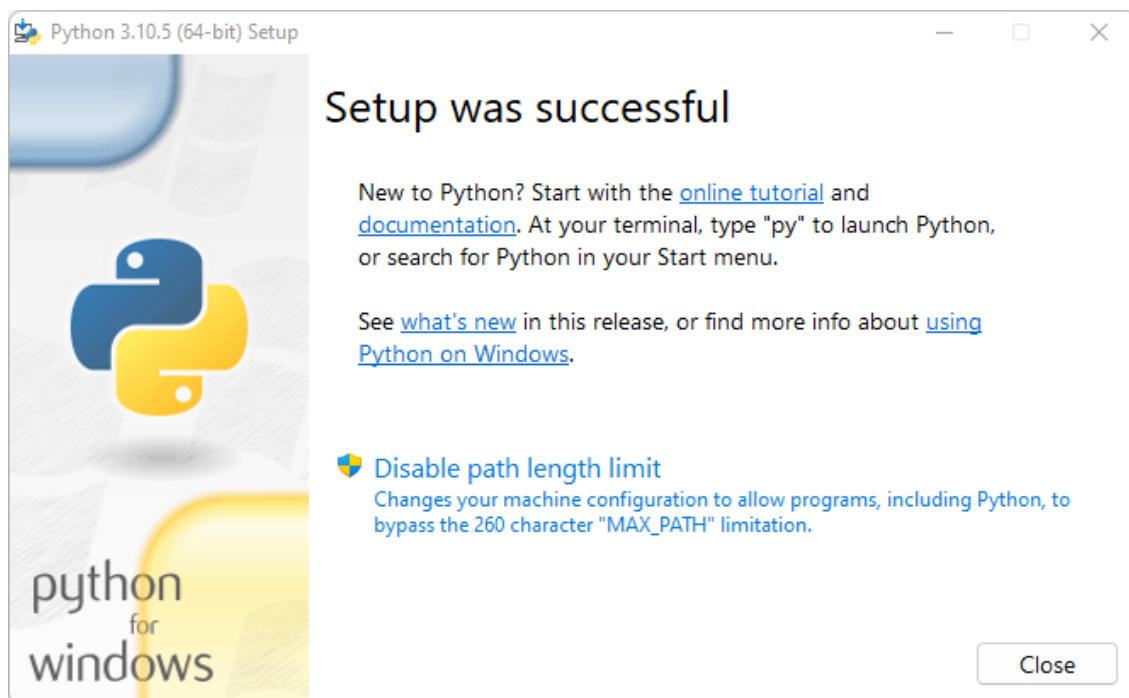

Kemudian akan muncul windows baru berupa dialog installer Python. Centang opsi add python to path, lalu klik install now.

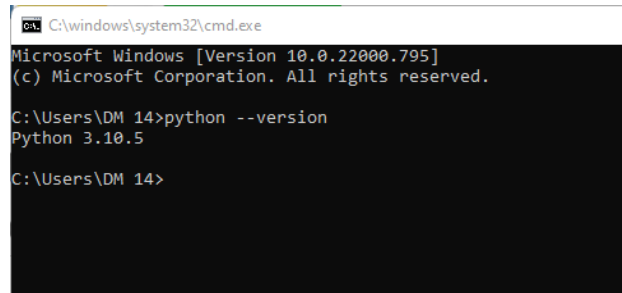

Kemudian prose install akan berjalan.

Setelah selesai maka tampilannya akan seperti ini.

Kemudian kita bisa mengecek apakah python sudah terinstall dengan benar dengan cmd.

```
C:\windows\system32\cmd.exe
Microsoft Windows [Version 10.0.22000.795]
(c) Microsoft Corporation. All rights reserved.

C:\Users\DM 14>python --version
Python 3.10.5

C:\Users\DM 14>
```
